International standard compliance 达到国际水准

The automotive industry is highly developed and uses the best technologies and the most innovative approaches. There is still room for improvement when it comes to global harmonisation regarding the design and development, production, and installation and servicing of automotive-related products.

ISO/TS 16949 brings different requirements together and thus aligns with and overtakes existing international automotive quality system standards. It has, to a great extent, replaced previous national automotive standards like QS 9000, VDA 6.1, EAQF and AVSQ.

A lot of organisations have already updated their quality management system to the current version of ISO/TS 16949, which consistently follows the process approach both in planning and performance. The majority of leading vehicle manufacturers only cooperate with companies that provide an ISO/TS 16949 certificate as proof that they fulfil that world class level of quality.

汽车行业是个高度发展的行业，采用最佳的技术和最创新的方法。但对于汽车相关产品设计、开发和生产，以及安装和维修服务(如果相关的话)的全球协调而言，仍然有改善的空间。

ISO/TS 16949结合了不同的要求，从而符合并超越了现有的国际汽车质量体系标准。在很大程度上，这个标准取代了先前的国家汽车行业质量体系标准，例如QS 9000、VDA 6.1、EAQF和AVSQ。

已经有很多组织将其质量管理体系升级到现今的ISO/TS 16949的要求，在策划和运行方面都遵循过程方法。实际上，大部分知名的汽车制造商仅仅和通过ISO/TS 16949认证的公司合作。ISO/TS 16949认证证书证明他们达到了世界级质量水平。
